Non standardised plug for Class III luminaire	<ul style="list-style-type: none"> - Sub clause 4.11.6 - Marking - Rated current 	OSM/LUM-ETF5	2019 ETICS Plenary Meeting
Question			
<p>In a class III luminaire, can a non standardised plug be allowed as means of connection to SELV? This plug is for engagement with a "special" socket-outlet which can only be supplied by the same manufacturer. In such a case, would it be enough for the plug and the socket to conform to the requirements of clause 15 "Screwless terminals and electrical connections" and sub clause 4.11.6 "Electro-mechanical contact system"?</p>			
Decision			
<ol style="list-style-type: none"> 1. Yes, as proposed. 2. Sub clause 4.11.6 applies; marking of the rated current is necessary (cf. cl. 3.2).
