Question			
<p>IP65 luminaires: the gasket provided by the manufacturer is not mounted; the appliance itself could be used indoors or outdoors and the instructions states: "fit gasket if necessary". The manufacturer does not provide a screw- gland for the cable entry. Is this kind of luminaire in compliance with the standard?</p>			
Decision			
<p>No, such a luminaire is not in compliance, because the glands are not delivered and the gasket is not mounted. Only a notice in the Instructions is not sufficient enough. The luminaire shall be delivered with all parts and instructions necessary to fulfill the requirements.</p>
