Floor luminaire with R7s halogen lamp	<ul style="list-style-type: none"> - Lighted object - Abnormal conditions - Mounting surface 	OSM/LUM-ETF5	2019 ETICS Plenary Meeting
Question			
<p>For a floor standing luminaire designed for indirect lighting and fitted with R7s halogen lamp. The luminaire turns over on a 15° inclined plane; should the temperature of the illuminated surface be measured? If yes, at what distance from the lighting source?</p>			
Decision			
<p>For such a luminaire the "lighted objects test" is not required in abnormal conditions. Only the mounting surface must be considered with the luminaire in the most unfavourable position.</p>
