Plug in nightlight – changing the lamp	<ul style="list-style-type: none"> <li>- Tool</li> <li>- Fixing screw</li> <li>- Access while in the socket</li> </ul>	OSM/LUM-ETF5	2019 ETICS Plenary Meeting
<b>Question</b>			
<p>It can be the case where a plug in nightlight has a fixing screw to prevent access when changing the lamp without tools. Normally this screw is positioned at the rear of the product so that such access is prevented when the product is connected to a fixed socket.</p> <p>Does this requirement also apply to any type of portable socket?</p>
