Use of European cables	<ul style="list-style-type: none"> - Internal and external cables - H05RN-F - Class II lighting chains - Series-connected lampholders 	OSM/LUM-ETF5	2019 ETICS Plenary Meeting
Question			
<p>EN 60598-1:2014 standard, requires for internal and external cables of Class II lighting chains other than ordinary, cables no lighter than 60245 IEC 57 (given in Table 1). In previous edition of 2010, the EN standard required for lighting chains using series-connected lampholders, a cable not lighter than H03RN-F (IEC making reference to 60245 IEC 57).</p> <p>The new EN standard makes no longer reference to European cables.</p> <p>Can the cable H03RN-F be still accepted for Class II lighting chains other than ordinary using series-connected lampholders?</p>			
Decision			
<p>Yes.</p> <p>Note a Table 1, the cable may consist of a single core provided with two-layer insulation corresponding to the specified standard sheet.</p>
