Fault condition test	- Power source - Fault condition test - EN 61347-1	OSM/LUM-ETF5	2020 ETICS Plenary Meeting
Question			
<p>What kind of power source is to be used when performing the fault condition test for the standards EN 62560 and EN 62776 to obtain reproducible and comparable test results in the ENEC scheme?</p>			
Decision			
<p>For the fault condition tests of EN 62560 and EN62776, the same power source as for clause 14 of EN 61347-1:2015.</p>
