Tissue paper specification reference	- Tissue paper - ISO 4046-4 - Resistance to fire, flame ignition, flammability	ETF5-OSM/LUM	2019 ETICS Plenary Meeting
Question			
Confirmation is requested as to whether or not the subject lighting standards have adopted the correct clause number of ISO 4046-4 for their tissue paper specifications.			
Decision			
Glow wire / needle flame testing and fault conditions can be performed according to the horizontal standards for glow wire / needle flame and fault condition testing. Therefore the paper described in this horizontal standard can be used.			
Clarification: the paper of the horizontal standards is considered equivalent to the paper described in ISO 4046-4 (4.187 and 4.215), for the purpose of the glow wire / needle flame and fault condition testing as indicator.			
Explanatory notes
