Wiring connected via soldering or crimped/twist-on wire connector	<ul style="list-style-type: none"> - Non-replaceable part - Attachment - Crimped or soldering 	OSM/LUM-ETF5	2020 ETICS Plenary Meeting
Question			
<p>1) Can the LED module be regarded as non-replaceable part if it is connected by means of soldering or crimped/twist-on wire connector?</p> <div style="text-align: center;">  </div> <p>2) Which attachment is applicable if the supply cable is fixed by the crimped or soldered connection?</p> <div style="text-align: center;">  </div>			
Decision			
<p>1) No, connection by crimping or soldering is not considered as non-replaceable. The final evaluation of the complete luminaire for compliance with clauses 4.29 and 4.30 needs to be done with the checks of clauses 4.29 and 4.30 accordingly.</p> <p>2) Y attachment is applicable, as crimped or soldered connection is not considered as breaking or destroying a luminaire.</p>
