

# WHAT IS THE CIG INSPECTION SCHEME?

1

**The base of the CIG Inspection Scheme is a Multilateral Inspection Agreement with currently 27 Members from all over Europe.**

Every member follows the same procedure, and all members accept each other's inspection results.

2

**CI&G inspectors have been handling various inspection requests from different certification bodies for decades.**

Our inspection processes are renowned worldwide, and our factory inspection reports are accepted by certification bodies globally.

3

**With the CIG Inspection Scheme, you benefit from a single inspection visit from a CIG inspector rather than multiple visits.**

The scheme establishes a harmonised approach among participating inspection bodies.

4

**The scheme provides substantial savings in both time and money for manufacturers.**

Reduced long distance flights, travel time, less on-site inspections, and simplification of internal processes.

5

## **The CIG scheme is open to non-European certification bodies.**

CIG members from regions beyond Europe can now take charge of inspections within their own areas.

**More information about the CIG Inspection Scheme can be found here:**
